Dane County Stormwater Management As-built Certification

Instructions: As-built certification, by a Wisconsin licensed Professional Engineer, is required within 10 days following installation of all stormwater management practices. Complete this form and attach the corresponding checklist(s) for each applicable practice category to the submittal. Checklists are intended to provide guidance to the engineer and assist in expediting the review process. **All submittals shall include stamped record drawings and the signed certification statement below. Additional documentation may be warranted depending upon how checklist items are addressed.** Hard copies will be accepted, however, electronic submittal is preferred.

Project Name: _____

Permit Number: _____ Approved Plan Date: _____

Name of Professional Engineer: _____

Required Certification

I, the undersigned, hereby attest that I am a Professional Engineer in good standing in the State of Wisconsin. I have reviewed the record drawings and materials accompanying this submittal. I certify that the site was developed in accordance with the approved stormwater management plan and all stormwater management facilities have been constructed using the appropriate methods and materials.
